

## **Stephen Crompton**

I was accepted into Ermelo Christian School as a preschooler and had obtained my Matric Certificate through them. I matriculated in 2003 before going to work in Pretoria as store manager for 4 years. Afterwards I had received an opportunity to work as a site foreman on various medium sized contracting sites for Tollig Bouers for 5 and half years. While I was in Pretoria I studied Quantity Surveyor through the University of the Free State. I currently reside in Ermelo with my wife and two boys and serve in Ruwach Ministries as an Assistant Pastor which is directly related to Ermelo Christian School. I am truly blessed to have been given the opportunity to be educated by Ermelo Christian School and the Ministry. I am privileged in being able to send my own Children to this school. I truly hope that the values and standards of this facility would continue and have it be established in many more students to come. Overall appraisal that I can acknowledge about this school would be its determination in building character. Something that every individual can take with them in their lives, anywhere they may go. The ACE program is defiantly the way to go forward as it helps in training the child to learn for themselves and to manage their own learning, especially with the condition of the universities that they are finding themselves in. It is the product that ACE delivers and that product is seen by the identity of the students that have left the schools.
